Data Security at e-tailize

Updated: 2022-10-28

Data centers

All data is stored in cloud services in Microsoft Azure. The physical location is Amsterdam. Azure adheres to security controls for ISO 27001, ISO 27018, SOC 1, SOC 2, SOC3, FedRAMP, HITRUST, MTCS, IRAP, and ENS.

Control & audit

We track statistics about the performance of our infrastructure and look for things we can improve.

Anonymization

Custom data that is handled, for example, orders. e-tailize will only retain information that's fundamental to our processes.

Data replication & consistency

We regularly back up your data to a remote location. Besides that, we ensure that information is consistent and information from products, ads, and analytics does not get confused between customers.

Encryption

We encrypt data as much as possible. The saving of secrets and credentials are encrypted.
